New flagship models offer high-performance CPU, extensive memory, large display and comfortable grip design.

Norderstedt, 12 February 2020 – CASIO Europe GmbH announced today the launch of two new Android™ mobile computers that are optimally designed for the use of business applications. The IT-G600 has a keyboard plus function keys and a 4.7" full touch display; the IT-G650 impresses with its large 5.5" full screen.

As new flagship models, the IT-G600 and IT-G650 are equipped with one of the most powerful CPUs in their product category and with a strong 4 GB RAM, which guarantees smooth work processes. The Android™ 9 operating system makes them very versatile. This means that not only business applications developed for the operating system can be used, but also industry specific ones, such as those used in the retail, manufacturing and logistics industries.

The new models are designed for a comfortable grip and operation with one hand. They feature CasioScan25° for particularly ergonomic working: the scanner is attached to the back with a 25° angle, for easy scanning of barcodes overhead, at face and at floor level. This excellent usability makes work more efficient and ergonomic.

Furthermore, the brand-new models are equipped with a CMOS imager for reading 1D and 2D codes, a 13 MP camera and an RFID module that not only reads RF tags, but can also be used for secure logging on using smart ID cards of the employees.

The IT-G600 is robust enough to withstand a fall from 1.8 m and even 2.5 m with a bumper (1.5 m and 2.1 m for the IT-G650). Both models can be used in temperature ranges from -20°C to 50°C. Since they are also dust- and waterproof (IP67 compliant*), the handheld terminals are suitable for a variety of working conditions.

** Dust cannot penetrate the unit. When temporarily submerged with a constant water pressure, water will not penetrate the unit.*

About CASIO

CASIO is one of the world's leading manufacturers of consumer electronics. Since it was founded in 1957, the company has employed groundbreaking technology and innovative design to develop new products, guided by its motto 'creativity and contribution'. Today, CASIO's global product range comprises watches, electronic dictionaries, calculators, musical instruments, projectors, cash register systems and mobile terminals.
